

AADC (Atheros Authorized Design Center)

Technical Resources For Atheros Wireless Implementation

From the Atheros Web Site:

"Atheros is interested in supporting novel applications for its wireless technology through the Atheros Authorized Design Center program. Our value-added partners have expertise spanning RF design, PCB layout, RTOS and driver development, industrial design and prototyping. For specialized customers looking for fast time to market for their applications, the AADC partners are the ideal starting point." - Atheros Communications, Inc. "Atheros Authorized Design Centers" <www.atheros.com/partners/AADC.html>

What Silex Offers:

As an AADC, Silex Technology America can provide all of the services necessary to enable embedded wireless networking in your products:

- Standard Wireless Modules (Mini-PCI and SDIO)
- Custom Wireless Radio Modules
- Wireless Driver Development
- Support and Consulting Services

In addition, Silex Technology America can engage with customers to execute an Atheros Technology License Agreement (TLA) which allows access to Atheros documentation and code for the following products:

- WLAN for Mobile & Portable Devices (AR600X Family)
- WLAN for Home Networking & Office Devices (AR500X/AR900X Family)

The following services are provided as part of the licensing engagement:

- Access to Atheros documentation from Silex secure Web site
- Access to Atheros source code from Silex secure web site
- A number of support hours as agreed to in the agreement
- Direct support from Silex's Field Application Engineers (FAE)
- Indirect support from Silex engineering (Through Silex FAE)
- If necessary, indirect support from Atheros engineering (Through Silex FAE)

Who is Silex ?

Silex Technology has more than 30 years of experience designing and manufacturing embedded products. Our hardware and software expertise includes wireless, wireless security and wired network technologies.

We have supported many customer applications including medical, weights and measures, transportation, printers, and home networking.

Silex focuses on solutions for original equipment manufacturers (OEMs), and has established relationships with companies such as Hewlett Packard, Canon, GE and Kyocera Mita.

With in-house state-of-the-art, ISO 9001:2000 / ISO14001:2004 certified manufacturing and testing facilities, we can also support your development with prototypes, pre-certification testing, thermal testing, reliability testing or provide turnkey products (hardware and software) to meet your most demanding requirements.
